

Music venue 013

Object	013 Music venue
Client	City of Tilburg
Projectmanagement	Bureau Franken
Contractor	Van de Ven, Bouw en Ontwikkeling
Application coating	I-S-T Spsittechniek
Renovation period	2015-2019

The Dutch music venue 013 was given its distinctive exterior of a soft material with CDs attached in 1998, designed by Benthem Crouwel Architects. In 2015, the City of Tilburg commissioned a thorough renovation of the building. BUREAU FRANKEN was asked for the management of this big project. In May 2019 it was time to renovate the exterior.

To protect the CD's on the exterior against weather conditions and wearing the CD's are treated with Baril's coatings. I-S-T spuittechniek is a company specialized in spray application and they coated the CDs with the Adhesion Promotor and with the Hybrid Duraclear for a long lasting protection.

Hybrid

Layer 1	586 Hybrid duraclear
Layer 2	084 Adhesion promotor
